Introduction

We are a company made up of professionals from various technical backgrounds. Our Company Profile will describe our purpose in setting up this organization.

➤ Vision

Wiraya Resources Sdn Bhd aims to be our Clients' first choice in catering to the needs of Corporate and Commercial organizations, We commit to provide highest standard of work practices and results without compromising on the safety aspects of operation and the personnel manning the equipment. - All of which will drive the organization's long term growth, value and success.

➤ Mission

To our Clients

- To fully understand and exceed our Clients' needs, wants and preferences by providing effective, efficient and value for money services.
- To ensure high standards of integrity with our Clients, Suppliers and Vendors.

To our People

- To dedicate fair treatment, mutual respect and trust among ourselves and foster an environment that encourages innovation, creativity and results through teamwork.
- To always practice Health and Safety protocols and meet commitments with personal responsibility for actions and results.

- Networking
- Intercom Systems
- MATV
- Electrical Works
- Technical Earth
- Fiber Optic

❖ **Wiring installation Includes:**

- Cabling.
- Inter-racking.
- Termination of connectors.
- Testing and Commissioning.
- Supply of installation materials and equipment.

History

Established in 2003, **Wiraya Resources Sendirian Berhad** was originally named Wiraya Enterprise which was set up in 1995. From catering only to smaller commercial businesses and residential premises, Wiraya Resources Sdn Bhd with affiliations to several local and international companies, expanded its clientele to corporations and medium-sized organizations.

With installation services, we strive to implement processes and systems that would provide clients with cost effective solutions. Organizations without a project department would benefit from our services as the client would not have to employ staff for just a specific task or project.

The People

Mr. Lee Keah Chang – Managing Director

Lee Keah Chang has been in the business pertaining to Audio Visual and Communication Systems for more than 20 years.

He enlisted in Royal Malaysian Air Force where he was trained both, locally and abroad in the University of Southern Illinois, USA to service Air Communication Systems vital to the performance of aircrafts under His Majesty's Service. In the same period, he continued to further studies and completed a 5th year Diploma in City & Guilds and pursued in courses in Manufacturing Management Consultant Course Japan and ISO Standards.

Although he was from the Rank and File of the RMAF, he was commissioned by the DYMM Seri Paduka Baginda to be an Officer of the RMAF in recognition of his continuous efforts to self-improve himself and for his leadership and teamwork among his comrades.

Upon completion of his Term of Service in the military in 1995, he established his own company, known then as Wiraya Enterprise. With a workforce of his own, they began with the business of installation of Astro Systems and on a sub-contract basis, installation of Audio Visual, Electrical and Broadcasting systems. Despite the recent economic downturn, they continued to develop a reasonable clientele of their own.

As the business expanded, he established Wiraya Resources Sdn Bhd in the year 2003 to undertake Broadcasting and Audio / Video projects for major broadcasting stations throughout Malaysia and other part of the world.
